

SuperMarket WinForms App

Documentation

By github.com/AntonioP1H

Login Page on start

The image shows a web browser window with a purple header bar. On the left of the header is a white icon of a supermarket with a red 'X' in the top right corner. The text 'Super Market' is written in white. The main content area is light gray. In the center is a purple icon of a supermarket. Below it is the word 'Login' in gray. There are two input fields: 'Username' and 'Password :'. Below these is a purple button with the word 'Login' in white.

Logging in as an Admin starts the main page

Logging in as an Administrator opens the main dashboard, where you can insert, update, and delete records across various database tables. While this walkthrough uses the **Product** page as an example, the same operations apply to **Brands**, **Suppliers**, and **Categories**.

Cashier Page

From the Cashier interface, users can:

- Process product sales and checkouts.
- Apply custom percentage discounts to items.
- Adjust cart item quantities based on available stock limits.
- Handle payment settlements.
- View comprehensive daily sales reports.
- Void transactions with an automated option to restore items back to inventory.
